## Paint and Materials

### Design Character

All materials to be provided as 8" x 8" sample or as part of a mock-up for approval.

V1	V2	V3	V4	V5
3M Perforated Vinyl	3M Frosted Vinyl	3M Translucent Vinyl Teal Green 3730-246L	3M Translucent Vinyl Kumquat Orange 3630-74 PMS 151C	3M Opaque Vinyl White 3630-20

RSM will review the samples and will keep one set as control samples throughout the fabrication process. RSM will send the other 2 sets back to the fabricator for distribution, one set for the fabricator to keep and one set to the client team.

If a color or material is not approved, the Fabricator must re-submit a new sample until it is approved by the team.

The logo for Village at Laguna Hills features a stylized 'V' shape composed of three segments: a dark grey bottom-left segment, a teal bottom-right segment, and an orange top segment. To the right of this graphic, the word 'VILLAGE' is written in a bold, orange, sans-serif font, and 'at Laguna Hills' is written in a smaller, dark grey, sans-serif font below it.

VILLAGE AT LAGUNA HILLS

# TENANT SIGNAGE CRITERIA

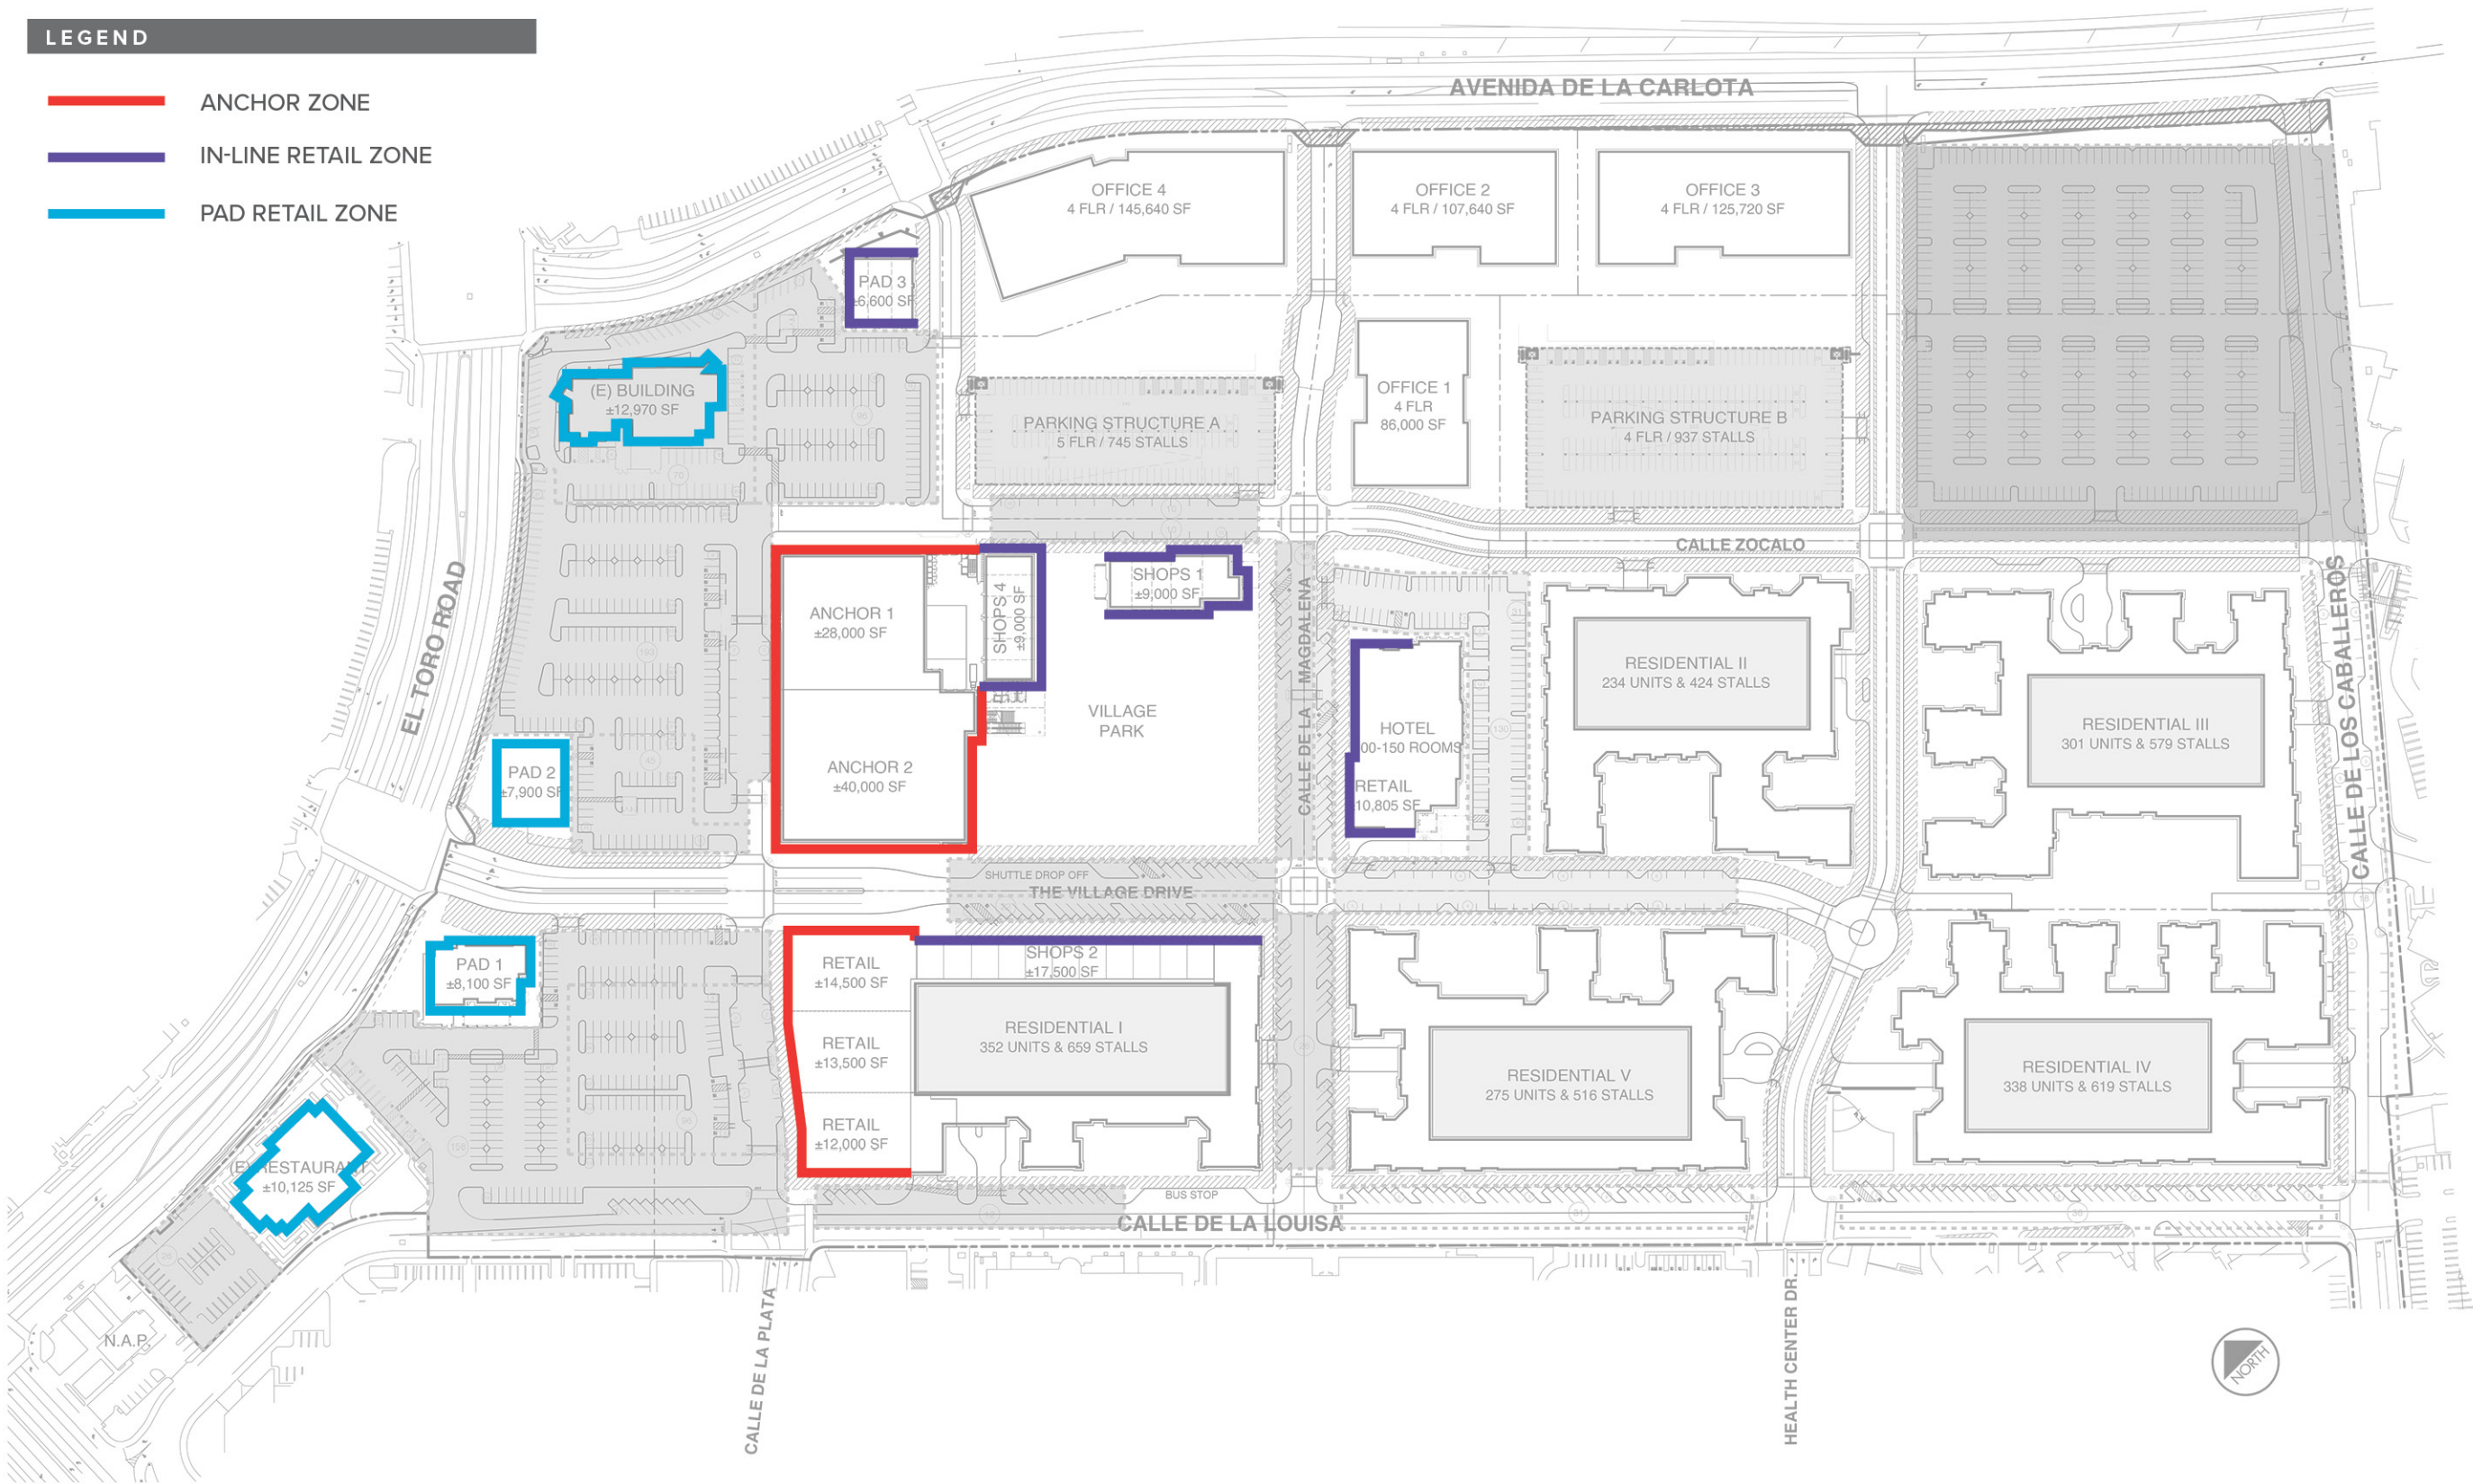

# Tenant Zones

UNDERSTANDING THE SITE

INTERSTATE 5 FWY

LEGEND

- ANCHOR ZONE
- IN-LINE RETAIL ZONE
- PAD RETAIL ZONE

# Anchor Building Identity

Note: Elevations are diagrammatic only and do not reflect final placement of signage

1 Example Anchor Building Identity Elevation  
Scale : 1"=10'

## ALLOWABLE ILLUMINATION

Halo Illuminated Channel Letters

White Face Illuminated Channel Letters

Day/Night Acrylic Channel Letters

Perforated Vinyl Face Painted Brand Color with White Illumination

## STANDARDS

**Construction**  
Face illuminated and halo channel letters are to be fabricated out of aluminum with a minimum metal thickness of 1/8" with a painted finish. All seams are to be welded and ground smooth. Channel depth to be no more than 5". Face illuminated letters to have 1" thick white acrylic faces. Trim caps are not permitted.

**Attachment**  
Halo Letter channels are to be mounted 1.5" from face of wall.  
Face illuminated channels are to be mounted 0.25" from face of wall.  
Round sleeves to be painted the color of the fascia. No visible attachments. All details to be coordinated with GC.

**Illumination**  
Light temperatures to be provided by Landlord to compliment architectural light temperature.

**Color Standards**  
Letter colors by tenant with landlord approval prior to fabrication. Returns may be painted a different color than the face.

# Anchor Building Identity

Note: Elevations are diagrammatic only and do not reflect final placement of signage

1 Example Anchor Entry Identity Elevation  
Scale : 1"=10'

## ALLOWABLE ILLUMINATION

White Face Illuminated Channel Letters

Exposed Neon Illuminated Channel Letters

Non-Illuminated Channel or Dimensional Letters

## STANDARDS

### Construction

Channel letters are to be fabricated out of aluminum with a minimum metal thickness of 1/8" with a painted finish. All seams are to be welded and ground smooth. Letter depth to be no more than 5".

Face illuminated letters to have 1" thick white acrylic faces. Trim caps are not permitted.

### Attachment

Face illuminated, open face, and exposed neon channel letters are to be mounted 0.25" from face of wall or flush with wall. Round sleeves to be painted the color of the fascia. No visible attachments. All details to be coordinated with GC.

### Illumination

Light temperatures to be provided by Landlord to compliment architectural light temperature. Exposed Neon channel letters are to be white neon only. Animated neon is not permitted. All neon fasteners, tube strands, mounts, and crossovers are to be painted to match inside of channel letterform. No alternatives to appear as neon

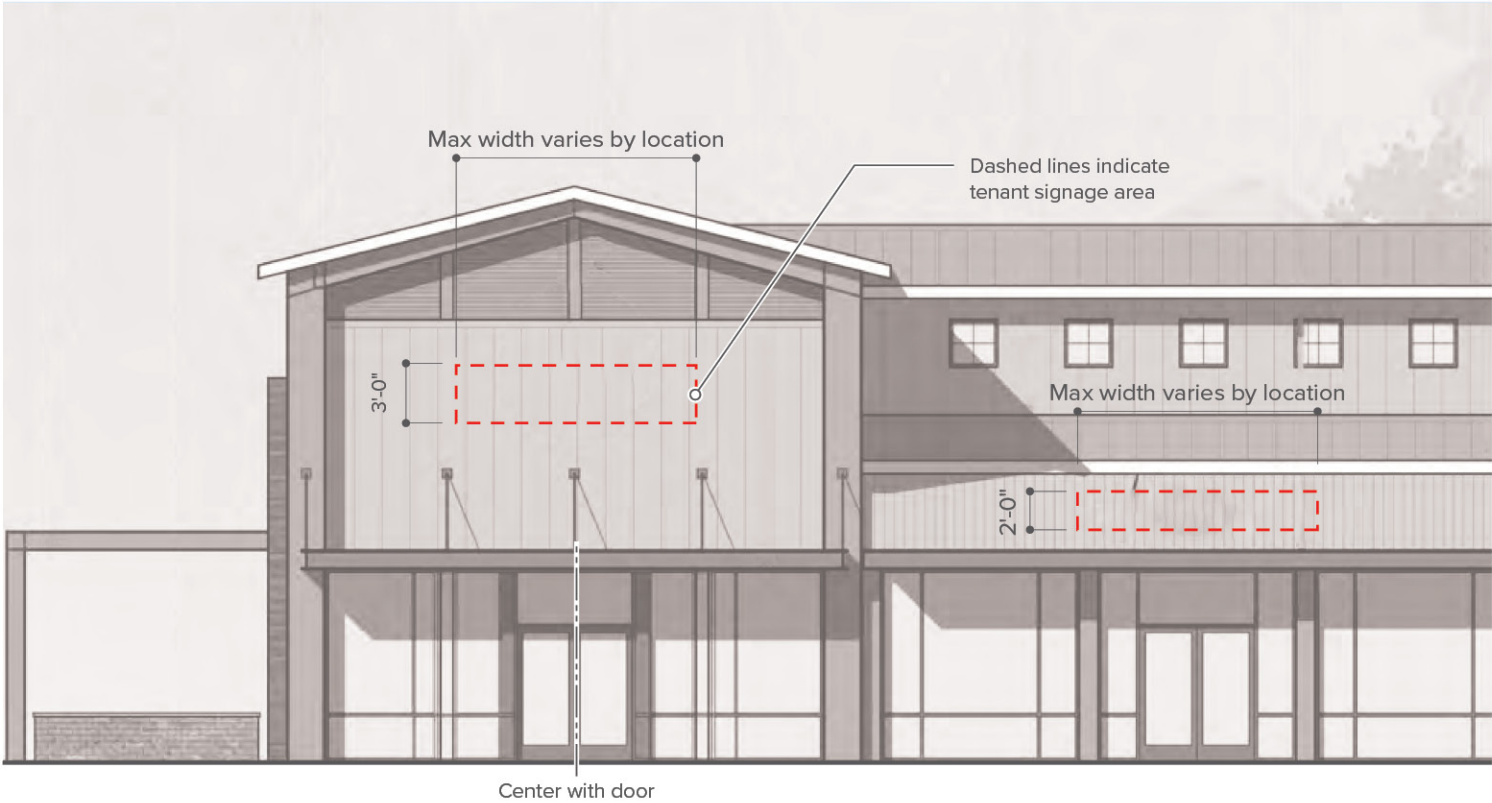

### Color Standards

Letter colors by tenant with landlord approval prior to fabrication. Returns may be painted a different color than the face. Open-faced channel letters to be painted a contrasting color from the building color.

# In-line Retail Identity

Note: Elevations are diagrammatic only and do not reflect final placement of signage

1 Example In-line Retail Identity Elevation  
Scale : 1"=10'

## ALLOWABLE ILLUMINATION

White Face Illuminated Channel Letters

Halo Illuminated Channel Letters

Exposed Neon Channel Letters

Non-Illuminated Channel or Dimensional Letters

## STANDARDS

### Construction

Face illuminated, halo illuminated, open face, and exposed neon channel letters are to be fabricated out of aluminum with a minimum metal thickness of 1/8" with a painted finish. All seams are to be welded and ground smooth. Channel depth to be no more than 5". Face illuminated letters to have 1" thick white acrylic faces. Trim caps are not permitted.

### Attachment

Face illuminated, open face, and exposed neon channel letters are to be mounted 0.25" from face of wall, flush with wall, or mounted to top of canopy. Halo Letter channels are to be mounted 1.5" from face of wall and are not permitted on canopies. Round sleeves to be painted the color of the fascia. No visible attachments. All details to be coordinated with GC.

### Illumination

Light temperatures to be provided by Landlord to compliment architectural light temperature. Exposed Neon channel letters are to be white neon only. Animated neon is not permitted. All neon fasteners, tube strands, mounts, and crossovers are to be painted to match inside of channel letterform. No alternatives to appear as neon.

### Color Standards

Letter colors by tenant with landlord approval prior to fabrication. Returns may be painted a different color than the face. Open-faced channel letters to be painted a contrasting color from the building color.

### Size

2' or 50% of the available sign band, whichever is smaller. Brand logos may be taller provided that the total aggregate sign area falls within the maximum area as defined on the elevation pages. No letters or logos to exceed eave line or parapet of the building.

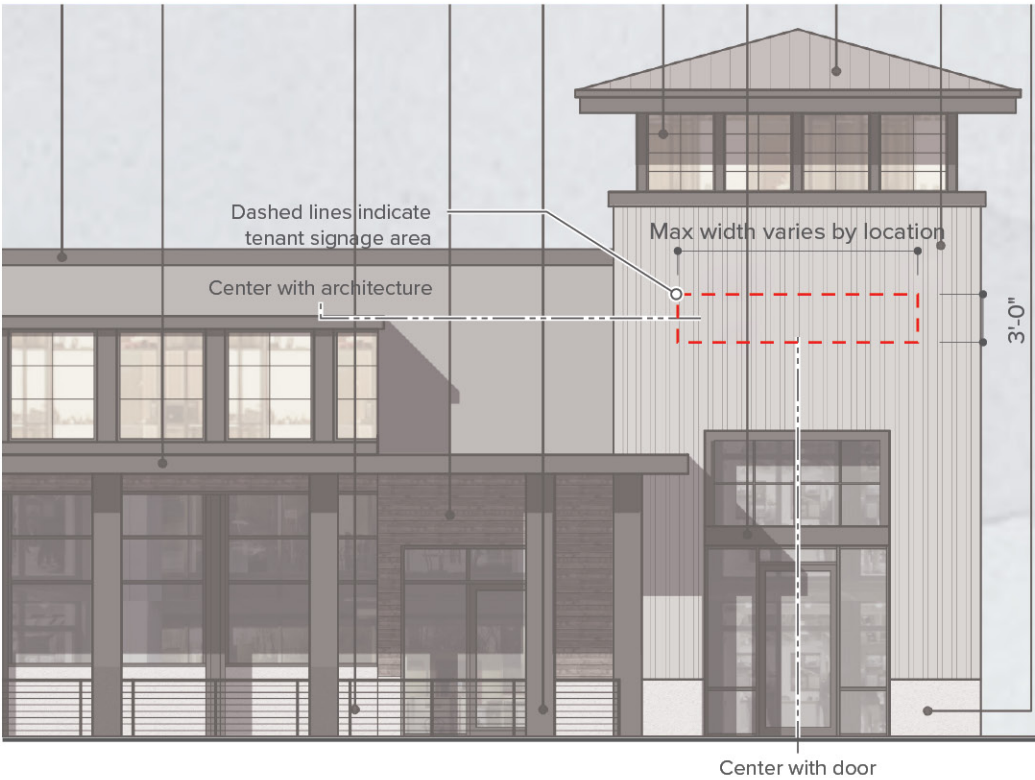

Tenants with storefronts that are 50 ft. - 99 ft in linear length may have maximum 3ft tall letters.

Tenants with storefronts that are 100+ ft in linear length may have maximum 4 ft tall letters.

# Pad Retail Identity

Note: Elevations are diagrammatic only and do not reflect final placement of signage.

1 Example In-line Retail Identity Elevation  
Scale : 1"=10'

## ALLOWABLE ILLUMINATION

White Face Illuminated Channel Letters

Halo Illuminated Channel Letters

Exposed Neon Channel Letters

Non-Illuminated Channel or Dimensional Letters

## STANDARDS

### Construction

Face illuminated, halo illuminated, open face, and exposed neon channel letters are to be fabricated out of aluminum with a minimum metal thickness of 1/8" with a painted finish. All seams are to be welded and ground smooth. Channel depth to be no more than 5". Face illuminated letters to have 1" thick white acrylic faces. Trim caps are not permitted.

### Attachment

Face illuminated, open face, and exposed neon channel letters are to be mounted 0.25" from face of wall, flush with wall, or mounted to top of canopy. Halo Letter channels are to be mounted 1.5" from face of wall and are not permitted on canopies. Round sleeves to be painted the color of the fascia. No visible attachments. All details to be coordinated with GC.

### Illumination

Light temperatures to be provided by Landlord to compliment architectural light temperature. Exposed Neon channel letters are to be white neon only. Animated neon is not permitted. All neon fasteners, tube strands, mounts, and crossovers are to be painted to match inside of channel letterform. No alternatives to appear as neon

### Color Standards

Letter colors by tenant with landlord approval prior to fabrication. Returns may be painted a different color than the face. Open-faced channel letters to be painted a contrasting color from the building color.

### Size

2' or 50% of the available sign band, whichever is smaller. Brand logos may be taller provided that the total aggregate sign area falls within the maximum area as defined on the elevation pages. No letters or logos to exceed eave line or parapet of the building.

Tenants with storefronts that are 50 ft. - 99 ft in linear length may have maximum 3ft tall letters.

Tenants with storefronts that are 100+ ft in linear length may have maximum 4 ft tall letters.

# Blade Signs

Note: Elevations are diagrammatic only and do not reflect final placement of signage

1 Example Blade Sign Elevation  
Scale : 1/4"=1'

## STANDARDS

### Construction

See Illustration for design style of bracket and permitted shapes.

Blade signs are encouraged to be fabricated of painted metal. All seams are to be welded and ground smooth. No molded fiberglass or other plastic signs.

### Attachment

Mounted perpendicular to building facade and may be suspended from a typical metal bracket or from the underside of the canopy

Shall be mounted with a minimum 8' clearance from the bottom of the blade sign to the finished floor

No two tenants shall located blade sign on the same demising pier.

Blade signs are to be placed near the entrances to the retail space.

### Illumination

Signs are to be non-illuminated.  
*No goosenecks or ornamental lighting.*

### Color Standards

Landlord to provide blade sign bracket and frame color. Tenants to paint blade signs a single brand color with tenant identity painted white.

Final color to be approved by landlord prior to fabrication.

# Window Graphics

Metallic

Etched-look

White

## STANDARDS

### Overview

Only trade name or graphic logo may be used. Store description, advertisements, or tag lines not allowed. Restaurants are allowed to describe their services or offerings, pending Landlord approval. Applied window graphics are to be submitted to the Landlord and approved in writing prior to installation.

### Attachment

All applied vinyl or flat cut graphics to be adhered to interior side of glass. All graphics must be laser-cut individual letters applied to the glass to allow visibility into the interior of the tenant space. The entire graphic to be mounted below 48" from finished floor.

### Size

Maximum letter height: 3".

### Color Standards

Metallic, white, or "etch-look" vinyl graphics are to be used. Colors to be integral to the material, such as 3M of Avery vinyl. No printed graphics or colors.

# Painted Wall Identity

## STANDARDS

### Overview

All painted identity designs are subject to landlord approval.

### Methods

All graphics are to be masked and painted.

### Design & Color Standards

Design should be appropriate for architectural conditions and reflect the overall character of the site. Maximum of 2 colors unless otherwise approved by landlord.

# Anchor Building

TENANT SIGNAGE

# General Guidelines

The following tenant signage design criteria is to help guide tenant designers, architects, and sign fabricators in the development, construction, and installation of identity signs for tenants of **Village at Laguna Hills**. Any special conditions or deviations from the guidelines in the sign criteria require written approval from the Landlord.

1. “Tenant Signs” shall be defined as any message that can be read from the exterior of the store. Not included in the definition are messages used to advertise products, sales, special events, etc.
2. All signs shall be designed, installed, illuminated, located, and maintained in accordance with the provisions set forth in this manual and all other applicable codes and ordinances.
3. Every submission will be evaluated with consideration of adjacent signs and architecture to ensure balance and quality.
4. At the landlord’s discretion, any tenant sign may be approved, without regard to the criteria outlined here. These exemptions are reserved for tenants employing the highest quality signage design and use of materials.
5. Unless specifically noted, tenant signage shall be limited to trade name and logo only.
6. Established logos shall also be permitted but shall be included in the area / size restrictions.
  - a. No tag-lines, slogans, or descriptions of services are allowed. No other brand names, product names or phrases may appear on the storefront (or in any area directly visible from the public space). Decals or other signing indicating product lines or credit card acceptability shall not be permitted on the storefront.
7. Sign vendor should submit shop drawings to the Landlord for final approval.
8. Documents should include: Storefront elevations: Signs drawn in location with dimensions showing letter height and widths, and a calculation of total sign area.

9. DETAILED SIGN DRAWINGS: Fully dimensioned and scaled shop drawings with exact dimensions, copy layout and type styles including front and side views, typical section details, material and color call-outs, illumination specifications, light temperature, attachment and mounting details, and penetrations into the building.
10. Following Landlord’s written approval of sign shop drawings, Tenant shall submit sign plans signed by the Landlord to the local authorities. Tenant shall furnish the Landlord with a copy of the applicable permits prior to Tenant’s installation of its signage.
11. Signs shall be inspected upon installation to ensure conformance. Any work unacceptable shall be corrected or modified at the Tenant’s expense as required by the Landlord.
12. Each submission will be reviewed by the a submittal design review board that is assembled by the Landlord.
13. Brand logos may be taller than allowable letter height provided that the total aggregate sign area falls within the maximum area as defined per each signage zone. No letters or logos are to exceed the eave line or parapet of the building.
14. Tenants with storefronts that are 50ft-99ft in linear length may have up to a 3ft tall letter excluding Anchor Building Tenant Signage
15. Tenants with storefronts that are 100ft+ may have 4ft tall letters excluding Anchor Building Tenant Signage

**A. MATERIALS**

- 1. Sign materials for permanent signs should be of the highest quality. All materials must be durable, of an exterior grade quality, and designed to withstand local weather conditions. Additional details by sign type. The use of other materials may be approved at the discretion of Landlord.
- 2. Acceptable sign material treatments are:
  - a. Painted aluminum
  - b. Wood or wood-like materials, with landlord approval
  - c. Cold-rolled steel or other raw finishes. These materials must be treated with a seal to prevent damage cause by weathering.
  - d. Dimensional letter forms with seamless edge treatments
  - e. White, frosted or gold-leaf vinyl on storefront glass.
  - f. All materials not specifically listed above must be submitted to the landlord for approval prior to fabrication.
- 3. The following materials are prohibited on all signs:
  - a. Etched or brushed metal
  - b. Sintra, MDF or MDO
  - c. Cardboard
  - d. Colored plastics or acrylics
  - e. Trim cap retainers
  - f. Glass
  - g. Screens, grids, or mesh
  - h. Simulated materials, i.e. wood-grained plastic laminate and wall covering.
  - i. Digitally printed vinyl such as the stick-on or decal type.
  - j. Faux neon LED strip lighting
  - k. Backplates or cloud backers

*Additional material and fabrication standards are included by individual sign type.*

**B. COLORS**

- 1. The use of color shall meet the following criteria:
  - a. Signs should be limited to a maximum of two colors per sign and will be reviewed by the Landlord for approval on a case-by-case basis.
  - b. All sign colors are subject to review and approval by the Landlord as part of the tenant signage submittal. The Landlord must approve variations from these standards
  - c. Color of letter face and returns are to contrast with building colors for good daytime readability
  - d. The interior of open channel letters are to be painted dark when against light backgrounds

*Additional color standards are included by individual sign types.*

**C. LIGHTING**

- 1. Lighting should be of no greater wattage than is necessary to make the sign readable at night
- 2. No sign shall be illuminated, in whole or in part, where the illumination is intermittent or varies in color or intensity from time to time, nor shall any sign be so illuminated that it interferes with traffic or with the effectiveness of, or obscures an official traffic sign, device or signal. The use of search lights is prohibited. All lighting will comply with the provisions in the zoning ordinance of the county
- 3. Where signs are internally illuminated, light-transmitting surfaces shall be non-gloss, matte materials
- 4. Only letters and logos shall transmit light while the backplate or background remains solid opaque. No illuminated backgrounds are allowed
- 5. Lighting for all tenant signs shall be turned off or reduced at Landlord’s discretion
- 6. Exposed fixtures, shades or other elements are to contribute to the design of the sign

## TENANT SIGNAGE

# Prohibited Sign Types

The following sign types and finishes shall be prohibited at Village at Laguna Hills:

- Illuminated sign boxes (can signs)
- Signs with tag lines, slogans, phone numbers, service description, or advertising of products.
- Trademark or copyright marks or insignias.
- Logos on fascia and canopy signs.
- Monument style signage.
- Temporary signage / coming soon signs – other than barricade graphics
- Illuminated canopies.
- Signs located on the rear elevation (except those signs required for delivery)
- Signs with exposed raceways, conduit, junction boxes, transformers visible lamps, tubing, or neon crossovers of any type.
- Cut metal sign panels.
- Rotating, animated and flashing signs.
- Pole signs and other signs with exposed structural supports not intended as a design element, except for code-required signs.
- Pennants, banners, or flags identifying individual tenants unless integrated into architectural storefront and approved by landlord.
- Vehicle signs, except for the identification of a business enterprise or advertisement upon a vehicle used primarily for business purposes, provided the identification is affixed in a permanent manner.
- Signs attached, painted on, or otherwise affixed to trees, other living vegetation, landscaping or natural materials.
- Any sign designed to be moved from place to place (freestanding standing stanchions) excluding A-frame sandwich boards.
- Signs attached, painted or otherwise affixed to tents or umbrellas, however, such signs may be permitted in conjunction with special design review by the Landlord.
- Balloons and inflatable signs.
- Any signs, including freestanding signs, advertising the availability of employment opportunities.
- Signs which emit sound, odor or visible matter, or which bear or contain statements, words or pictures of an obscene, pornographic or immoral character.
- Back plates behind signage are typically prohibited, but maybe considered on a case-by-case basis when integrated into storefront mullions. Not to exceed 20% larger than overall max sign dimension and must be an integral part of the sign design.
- Human Signs/Spinners
- Fluorescent or reflective sign colors.
- Simulated materials, i.e. plastic laminate, wall covering, paper, cardboard, Sintra or foam.
- Signs made with plastic, Lexan, translucent or opaque. Clear faces are allowed if used to protect neon.
- Discontinuous materials on sign bands.

## TENANT SIGNAGE

# Prohibited Sign Types

---

The following should also be avoided:

- Inadequate clear space around sign - Signage must fit comfortably into signage area and not appear too large for the architecture. Signs should fit within the constraints of the architecture and should not extended from edge to edge. Sign should be scaled appropriately to fit the tenant space.
- Signs outside of the sign area - Tenant should place their signs so they are centered vertically on the elevations. Tenant signs should be scaled appropriately for the architecture. Tenants are to locate and scale their signage for their appropriate sign band area.
- No more than one primary sign in any vertical space - Signage and awnings should be spaced with enough space in between to not crowd one another. Wall signs should not be used in combination with canopy signs on any vertical space.
- No more than one primary sign in any vertical space - An overabundance of signage is not permitted. Each tenant is allowed on primary sign per entry or elevation.
- Excessive use of window graphics are not permitted. If a window space requires privacy, artistic vinyl installations are permitted, but graphic signage and lifestyle imagery covering the entire window are not permitted.
- High contrast background patterns on canopies - Tenant signage should be on backgrounds that are solid or low-contrast tone-on-tone patterns. Tenants should not use more than 2 colors for their exterior graphics.
- Low contrast signage - Tenant signage should contrast with architectural surround. Light letters are not permitted on dark backgrounds. Dark letters are permitted on light backgrounds.
- Use of graphics on signs that are not part of the approved DBA - Awnings and graphics are preferred to be solid or no more than 2 colors. If awnings are patterned, they should use no more than two colors and the colors must be within the same color family. Tenant storefronts should be painted neutral colors.
- Light leaks - All channel letter weep holes should have baffles or hats to prevent light leaks. In general, illumination must be consistent, no light leaks and LEDs must be diffused properly to prevent shadows or hot spots.

## TENANT SIGNAGE

# Fabrication Requirements

.....

All sign fabrication work shall be of excellent quality and identical of Class A workmanship. All logo images and type styles shall be accurately reproduced. The Landlord reserves the right to reject any fabrication work deemed to be below standard.

1. Signs must be made of durable rust-inhibiting materials that are appropriate and complementary to the design of architecture. All formed metal, such as letter forms, shall be fabricated using full-welded construction with all joints ground smooth.
2. All ferrous and non-ferrous metals shall be separated with non-conductive gaskets to prevent electrolysis. In addition to gaskets, stainless steel fasteners shall be used to secure ferrous to non-ferrous metals.
3. Series 300 stainless steel threaded rods or anchor bolts shall be used to mount sign letters, which are spaced out from background panel and must be finished to blend with the adjacent surface. Angle clips will not be permitted.
4. Paint colors and finishes must be reviewed and approved by the Landlord. Color coatings shall exactly match the colors specified on the approved plans.
5. Surfaces with color mixes and hues prone to fading (e.g., pastels, complex mixtures, intense reds, yellows and purples) shall be coated with ultraviolet-inhibiting clear coat in a matte or semi-gloss finish.
6. Joining of materials (e.g., seams) shall be finished in such a way as to be unnoticeable. Visible welds shall be continuous and ground smooth. Rivets, screws, and other fasteners that extend to visible surfaces shall be flush, filled, and finished so as to be unnoticeable. Finished surfaces of metal shall be free from canning and warping. All sign finishes shall be free of dust, orange peel, drips, and runs and shall have a uniform surface conforming to the highest standards of the industry.
7. All lighting must match the exact specifications of the approved working drawings.
8. Surface brightness of all illuminated materials shall be consistent in all letters and components of the sign. Light leaks will not be permitted.

9. All conduit, raceways, crossovers, wiring, ballast boxes, transformers, and other equipment necessary for sign connection shall be concealed. All bolts, fastenings and clips shall consist of enameling iron with porcelain enamel finish; stainless steel, anodized aluminum, brass or bronze; or carbon-bearing steel with painted finish. No black iron material will be allowed.
10. Penetrations into building walls or structures, where required, shall be made waterproof by the Tenant's sign contractor.
11. Location of all openings for conduit sleeves and support in sign panels and building walls shall be indicated by the sign contractor in the shop drawings submitted to the Landlord. Sign contractor shall install same in accordance with the approved drawings. Landlord approval required prior to installation.
12. In no case shall any manufacturer's label be visible from the street or from normal viewing angles.
13. All signs shall conceal all wiring, conduit, ballasts, transformers, starters and other necessary equipment within their components or behind storefront construction.
14. All letter & logo elements to be separate, i.e. dots of "i", apostrophes. No cross overs are permitted.
