MOTORCYCLE SAFETY AWARENESS MONTH

As riding season kicks into gear, it's the perfect time to remind both drivers and motorcyclists to stay alert and share the road responsibly.

The Goal: Promote safe riding and reduce motorcycle-related accidents and injuries.

Drivers:

- Watch for motorcycles, give them space, and check blind spots.

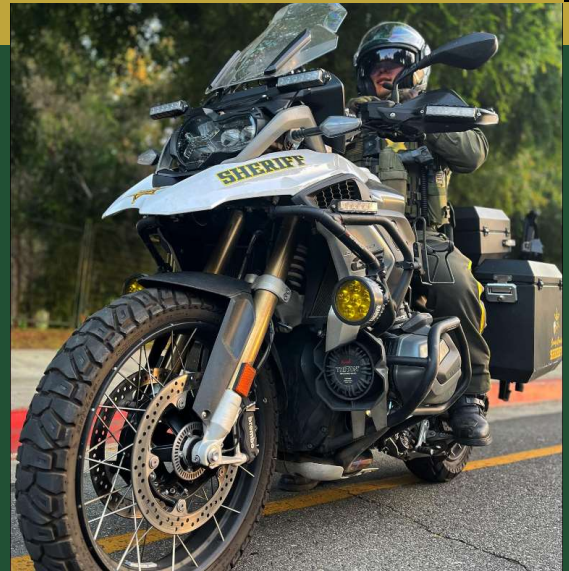

Riders:

- Wear protective gear, ride defensively, and keep your bike in top shape.

Let's keep the roads safe for everyone this summer season!

"LOOK BEFORE YOU LOCK" – SUMMER CAR SAFETY CHECKLIST

- ☐ Call 911 immediately if you see a child or pet alone in a vehicle.
- ☐ Pets overheat quickly—leave them at home during errands.
- ☐ Remember: On a 90°F day, a car can hit 120°F in just 10 minutes.

BEAT THE HEAT: TIPS TO STAY COOL AND SAFE

As temperatures rise, it's important to protect yourself from heat-related illnesses. Stay indoors during the hottest parts of the day and opt for air-conditioned spaces when possible. Hydration is key—drink plenty of water throughout the day, even if you're not thirsty. Avoid strenuous outdoor activities during peak heat hours, and watch for signs of heat exhaustion such as dizziness, headache, and excessive sweating. Lightweight, light-colored clothing can also help you stay cool and comfortable.

WHAT IS A COOLING CENTER?

A cooling center is a public, air-conditioned space where people can go to escape extreme heat during heatwaves or unusually high temperatures. These centers are especially important for vulnerable populations, such as the elderly, young children, individuals with medical conditions, and those without access to air conditioning.
